### SSL Certificates

NameCheap offers cheap SSL Certificates. An SSL certificate acts as third-party verification for a website's security. It verifies the strength of the Secure Socket Layer encryption used when a user connects to the site and connects that encryption to the organization or individual that owns and maintains the website. SSL certification and validation are a necessary piece of web security for any business that collects information from its users. <https://www.namecheap.com/security/ssl-certificates/>

### Hosting

Fast, Reliable, Easy Web and Cloud hosting for Businesses and Developers looking to scale. ZebraHost was founded 20 years ago in Des Moines, Iowa during the height of the dotcom bubble. As IT businesses collapsed, we expanded. We were fueled by the developers building apps that impact the world around them, and the beautiful websites that businesses rely on us daily to keep up. But we aren't resting on our laurels. We've learned several lessons from the crash that to this day, provide the framework for how we operate. From our 7 core values, to our consultative, client-centric approach to doing business, we are trying to make the cloud more people focused. <https://zebrahost.com/about.html>
